

MMT1616

Mopping systems: MidMop - A Class All its Own
The System Supports Both String Mops and Flat Mops

Its compact design allows for easy storage while providing a go anywhere dual bucket mopping system
The patented wringer is positioned high on the trolley providing better ergonomics and full access to both buckets at all times
The MidMop permits a true twin bucket system to be followed or the wringer can be easily moved from one side to the other should both buckets be needed

Structural foam construction ensures maximum durability
Easily removed 4 gallon buckets allow for simple filling and emptying
