

Drain Flush

Drain Cleaner

DRAIN FLUSH keeps drains clean and free flowing. It quickly dissolves organic obstruction and is fully inhibited to prevent corrosion.

Recommendations

Suggested dosage recommendations are general and may be varied depending on conditions, type of obstruction, and size of traps and lines. This product contains sulphuric acid. Please follow all label directions and precautions carefully.

Add suggested dosage to drain. Always add product slowly down sides of toilets, drains etc. Allow to stand 15 minutes, then flush with large amounts of cold water. Do not pour into standing water or completely plugged drains. Always use COLD water to flush drains. Do not store with alkaline products.

Physical Properties

Appearance: Clear liquid

Odour: Pungent

pH: < 1.0

Specific Gravity: 1.84
